

WEEKLY INTERNSHIP REPORT

Week No.: 11	Date: 10/08/2026 – 16/08/2026
Intern Name: Aditya Pawar	

Task Given by Supervisor:

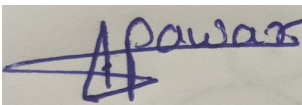

- Build the complete LangGraph workflow connecting all agents.
- Develop the question answering endpoint.

Work Completed This Week:

- Built the **LangGraph workflow** connecting Retrieve, Generator, Debate, Critic, Judge, and Verify in sequence.
- Implemented the **POST /ask** endpoint with a **use_agents** option.
- Designed the response to include the **answer, confidence, citations, evidence, agent trace, debate summary, and processing time**.
- Tested the end-to-end pipeline using sample documents.

Remark by Supervisor:

The intern completed the full multi-agent pipeline successfully. The agents work together smoothly and the response is well structured.
