

WEEKLY INTERNSHIP REPORT

Week No.: 8	Date: 20/07/2026 – 26/07/2026
Intern Name: Aditya Pawar	

Task Given by Supervisor:

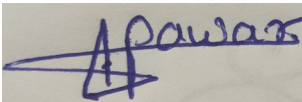

- Study the LangGraph framework and design the agent architecture.
- Implement the base agent and the Generator agent.

Work Completed This Week:

- Studied **LangGraph** concepts such as state, nodes, and edges, and designed the **six-agent pipeline**.
- Created the **BaseAgent** abstract class to provide a common structure for all agents.
- Integrated the **Groq LLM** through LangChain and configured the model through environment variables.
- Implemented the **Generator agent** to produce the initial answer from the retrieved context.

Remark by Supervisor:

The intern understood the multi-agent concept and built a reusable agent structure. The Generator agent produces context-grounded answers.
