

WEEKLY INTERNSHIP REPORT

Week No.: 3	Date: 15/06/2026 – 21/06/2026
Intern Name: Aditya Pawar	

Task Given by Supervisor:

- Attend technical sessions on Generative AI and Agentic AI.
- Explore potential project ideas and identify a suitable problem statement.
- Discuss the proposed project with the mentor and obtain approval.
- Begin understanding the project requirements and scope.

Work Completed This Week:

- Attended technical sessions covering the fundamentals of Generative AI and Agentic AI.
- Explored multiple project ideas and analyzed their feasibility.
- Selected the project topic "**VeriMind – AI-Powered Multi-Agent Knowledge Verification and Document Intelligence Platform**" and received approval from the mentor.
- Studied the problem statement, defined the project objectives, and gained an understanding of the overall system requirements.

Remark by Supervisor:

The intern actively participated in the technical sessions and successfully finalized the project topic. Demonstrated good analytical skills in understanding the problem statement and planning the project development.
