

WEEKLY INTERNSHIP REPORT

Week No.: 4	Date: 22/06/2026 – 28/06/2026
Intern Name: Aditya Pawar	

Task Given by Supervisor:

- Prepare the project documentation required for development.
- Develop the Design Document, Product Requirements Document (PRD), Research & Development (R&D) Document, and Tech Stack Documentation.
- Discuss the project architecture and implementation strategy with the mentor.
- Incorporate mentor feedback and finalize the project planning before implementation.

Work Completed This Week:

- Prepared the **Design Document**, outlining the system architecture, modules, workflow, and overall design of the **VeriMind** platform.
- Created the **Product Requirements Document (PRD)**, defining the project objectives, features, functional requirements, and expected outcomes.
- Completed the **Research & Development (R&D) Document**, covering the back-ground study, literature review, existing solutions, and proposed approach for the project.
- Developed the **Tech Stack Documentation**, selecting the technologies, frameworks, tools, and software required for project development.
- Attended mentor guidance sessions to discuss the project architecture, implementation roadmap, and documentation. Incorporated valuable suggestions and feedback received during the meetings.
- Finalized the project planning and prepared to begin the implementation phase from the following week.

Remark by Supervisor:

The intern prepared comprehensive project documentation and actively participated in mentor review sessions. The documentation was well-structured, and the project planning was completed successfully. The project is ready to proceed to the implementation phase.
